Instructions to authors (revised September 1982)

Manuscripts in English, German or French should be submitted in duplicate (i.e. the original with one copy, and three sets of illustrations) to Acta Tropica, Swiss Tropical Institute, Socinstrasse 57, CH-4051 Basel, Switzerland. They will be sent, as a rule, to two referees. The decision to accept, revise, or refuse a paper will be made by the editors. The editors assume that papers submitted to Acta Tropica have not been and will not be published elsewhere.

The *manuscripts* should be typewritten double-spaced with a wide margin. Original papers **should not exceed 10 printed pages** including tables and figures. Exceptionally, the editors may accept larger manuscripts. The authors are charged for exceeding pages at a rate of sFr. 150.– per page.

Original papers should be organized as follows: Summary – up to 5 Key words – Introduction – Material (or Patients) and Methods – Results – Discussion – Acknowledgments – References.

A short and precise *summary* only in English must precede original papers and review articles and contain the essential information. For papers written in German or French the summary should be more detailed and must be preceded by the English translation of the title.

Short communications are only accepted in English and may not exceed 2 printed pages including tables and figures.

Bibliographical references in the text should be given by the name of author(s) and the year of publication. In the case of 3 or more authors they are cited in the text: (Meier et al., 1983). The list of references at the end of the paper should be arranged in alphabetical order of the authors, featuring name and initials of authors, full title of paper, name of journal, followed by volume, page(s), and year of publication. For books the name and address of the publishers should also be mentioned.

Examples:

Peters W.: Chemotherapy and drug resistance in malaria. Academic Press, London/New York 1970.

Saunders J. P., Brown G. W., Shirai A., Huxsoll D. L.: The longevity of antibody to *Rickettsia tsutsugamushi* in patients with confirmed scrub typhus. *Trans. roy. Soc. trop. Med. Hyg.* 74, 253-257 (1980).

Weitz B.: Methods of identifying the bloodmeals of *Glossina*. In: The African trypanosomiasis, ed. by H. W. Mulligan, p. 416-423. George Allen & Unwin Ltd., London 1970.

Tables and figures should be added to the manuscript on separate sheets and numbered, legends of tables and figures being on a special sheet. In view of production costs, the number of figures and tables must be restricted to an irreducible minimum. Only 3 pages of half-tone illustrations per manuscript will be accepted. Additional half-tone pages will be charged for at a rate of sFr. 150.– per page. Color plates can be reproduced only as an exception and at the author's expense.

Photographs must be presented on glossy paper in three complete sets. In the first 2 sets labels and explanatory marks to be added should be indicated with black or white transfer letters. Photographs must be arranged into groups and mounted on a white board in camera-ready form (maximal size: 11.7 × 17.6 cm). The third set will consist simply of the photographs, unmounted, with no additions at all, only numbered on the back.

The complete *postal address* of the authors must be indicated.

Galley proofs will be sent to the authors for correction. Author's corrections up to 10% of the cost of composition are paid for by the publishers; additional corrections at the author's expense. Proofs are to be returned immediately, otherwise publication may be delayed.

The publishers will produce 50 *reprints* of each paper free of charge. Further copies will be provided at the rates indicated in the order form you will receive with the galley proofs.

Tropical Diseases Research Series

Published on behalf of the
UNDP / WORLD BANK / WHO

Special Programme for Research and Training in Tropical Diseases

The series will deal with current outstanding problems in research related to the control of major infectious tropical diseases. It is intended to attract scientists working in other disciplines to the problems and opportunities for research which are offered by the infective agents of concern to the Programme, and to acquaint those already working on these organisms with new awareness for investigation which advances in other biomedical sciences may offer.

The Special Programme is a goal-oriented research and training programme with two objectives: (1) Research and development to obtain new and improved tool for the control of major tropical diseases, and (2) Strengthening of the research capability of the tropical countries.
