¹ Due to outsourcing, comparison with previous year is not possible.

² Fom 2001 without occupations whose training is controlled by a federal office (newly in login).

³ Comparison with previous year is not possible. New standards and measuring methods.

Compass.

We ensure the future success of the SBB by assuming our commercial and social responsibility in a well-balanced way.

We are successful

- → if satisfied customers and clients use our offers even more intensively,
- → if committed and competent employees work with us with pride and joy,
- → if we can keep the costs under control and make an adequate profit,
- → if the Confederation and the Cantons can get even better services in return for their grants,
- → if we can put to advantage the synergies of the integrated enterprise and the chances of the strong brand name.

We fulfill our performance mandate

- → by maintaining high quality standards which means offering safe, punctual and comfortable transport in clean surroundings,
- → by a further development of our offers in passenger and goods transport, and by increasing the sales of train paths, also to third parties,
- → by actively addressing conflicts of interests where train paths are scarce and by looking for solutions at an early stage,
- → by promoting the Swiss system of public transport through strong cooperation with our partners,
- → by developing the timetable in our capacity as national system leader, and by professionally marketing the train paths.

We regard ourselves as a Swiss enterprise, because

- → with Rail 2000, we connect the individual regions with one another by offering yet faster, more frequent and more direct services,
- → together with our partners, we plan and build the Swiss railway network for 2020,
- → we seize the new chances in bordercrossing regional and long-distance passenger traffic, and connect Switzerland even better with the neighbouring countries and their regions bordering to Switzerland,
- → we optimize domestic, import and export goods traffic and guarantee the environmentally-friendly provision of Switzerland with goods by means of a sustained growth,
- → we establish ourselves in transalpine wagonload and intermodal traffic as a fast-growing European transport supplier offering a high quality, thereby favouring a shift of heavy goods transport from road to rail in agglomerations and mountain valleys,
- → we turn our chances as important real estate owner to profit, and develop the big stations yet more so they become pulsating centres of urban life.

Explanation of terms.

Term Combined (or intermodal) traffic	Definition Multi-modal transport (e.g. road and rail) of goods without change of the packing units; <i>Unaccompanied combined traffic:</i> Transport of goods in packing units (containers, swap bodies, semi-trailers) without transport of the power vehicle for road transport; <i>Accompanied combined traffic:</i> Railway transport of the whole road lorry and its load, accompanied by its driver (Rolling Road).
Current assets	Property items listed on the balance sheet, remaining in the enterprise for a short period of time only, and which are needed for the preparation of the offer: Raw materials, auxiliary means and means of operation such as fuels, lubricants, claims, credit balances at the bank, cash and cash equivalents.
Depreciations	Pro rata decrease of value of tangible assets due to ageing and wear. Ordinary depreciation: Taking account in yearly rates until expiry of the presumed service life. <i>Extraordinary depreciation:</i> Taking account of unexpected decrease of value due to special reasons (have become out- dated, damaged, etc.).
Domestic traffic	Traffic whose points of departure and destination are situated in the same country.
EBIT	Earnings before interest and taxes. Benefit before financial expenses (payment of interest on loans), financial income (interest payments received from financial assets and participations), taxes on income and capital.
Fixed assets	Assets as valuated on the balance sheet and which serve the enterprise for a longer duration of time: track installations, real property, buildings, line equipment, safety installations, vehicles, concessions, etc.
Grants	Financial compensation for uncovered costs of ordered transport services.
Length of lines	Length of lines owned by the railway transport undertaking and serving public transport, irrespective of its present use.
Local traffic	Operation of lines with short distances between stops for a concentrated transport service to centres and towns, as distinct from long-distance and regional traffic. Services of local traffic are not eligible for federal government grants.
Long-distance traffic	Fast services with great distances between stops for the connection of big- and medium-sized centres, operated by the SBB with own responsibility for profit and loss. To be distinguished from regional traffic and local traffic.
Mileage	Distance covered by all the trains, measured in train-kilometres.
Network access (free)	The system whereby an infrastructure operator places its track network at the disposal of a railway company for train runs, against remuneration (train path price).

Operated lines	Lines operated by a railway company, plus lines of other companies leased or operated, less lines leased out to other companies or own lines operated by other companies.
Operating performance	Trains operated, representing transport services offered, shown in train-km.
Passenger- kilometres	Standard measure for traffic performance (demand) in passenger traffic, expressed in kilometres covered by all passengers.
Productivity	Ratio of output to input. Productivity can be expressed without valuation (e.g. trains per line) or with valuation (e.g. ticket receipts against personnel cost).
Regional traffic	Services operated with a medium distance between stops, for the connec- tion of regional centres among themselves, and of rural places with towns. As distinct from long-distance and local traffic. The federal government and the cantons compensate the transport companies for the uncovered costs (not covered by ticket receipts) of the offer they had ordered.
Seat kilometres	Standard measure for the passenger transport services offered by a railway. Corresponds to the product of the car-kilometres covered and the (mean) number of seats of the rolling stock used.
Seat occupancy rate (mean)	Ratio of seats used and seats offered, all trains of all lines considered.
Tonnage	Traffic volume in freight traffic. <i>Overall gross tons:</i> overall weight of a freight train including the tares of the wagons and including the locomotive(s). <i>Gross tons:</i> hauled tonnage, meaning overall weight of the train without locomotive(s). <i>Net tons:</i> actual load of a freight train. <i>Net-net tons:</i> own weight of the transported goods in unaccompanied combined traffic without the tare weight of the containers, swap bodies or semi-trailers.
Tonne-kilometres (tkm)	Standard measure for transport performance (demand) in freight traffic. It corresponds to the transport of one ton over a distance of one kilometre.
Train path	Right to use the infrastructure for a train run, defined as to place and time
Train path kilometres	Performance of infrastructure operators. Corresponds to the train paths used by the railway transport companies against remuneration (train path price).
Train traction	The conveyance of trains. Depending on the source of energy, type of engine and power transmission, it is distinguished between electric, diesel-electric and diesel-hydraulic traction, and steam traction.
Transport offer	The product generated by the railway transport company, measured in train-, car- or seat -kilometres.
Transport performance	The services used by the customers during a certain period, in passenger traffic measured in passenger-km (pkm), in freight traffic in tonne-km (tkm).

French.

Italian.

Train complet	Treno completo
Ligne de contact	Linea di contatto
Trafic combiné	Traffico combinato
Trafic intérieur	Traffico interno
Voiture à deux niveaux	Carrozza a due piani
Exportations	Traffico d'esportazione
Abonnement général	Abbonamento generale
Indemnité compensatoire	Indennizzo
Tonne brute	Tonnellata lorda
Abonnement demi-tarif	Abbonamento metà-prezzo
Importations	Traffico d'importazione
Trafic international	Traffico internazionale
Longueur du propre réseau	Lunghezza della propria rete
Longueur exploitée	Lunghezza esercita
Passage à niveau	Passaggio a livello
Trafic grandes lignes	Traffico a lunga percorrenza
Tonne nette	Tonnellata netta
Prestation d'exploitation	Prestazione d'esercizio
Train voyageur	Treno viaggiatori
Voyageur-kilomètre	Viaggiatore-chilometro
Ferroutage	Traffico Huckepack
Ponctualité à l'arrivée	Puntualità all'arrivo
Réseau (entreprise ferroviaire)	Ferrovia (impresa)
Gare	Stazione
Trafic régional	Traffico regionale
Matériel roulant	Materiale rotabile
RER (réseau express régional)	Treno celere regionale
Aiguillage	Scambio
Train pendulaire	Treno ad assetto variabile
Tonne-kilomètre	Tonnellata-chilometro
Voie	Binario
Réseau ferroviaire	Rete ferroviaria
Prestation de trafic	Prestazione di traffico
Volume du trafic	Volume del traffico
Sillon	Traccia d'orario
Train-kilomètre	Treno-chilometro
Trafic par wagons complets	Traffico a carri completi
Effectif du personnel	Organico
Amortissements	Ammortamenti

34/FREIGHT TRAFFIC

Types of freight traffic.

Unaccompanied combined traffic: Cargo Domino

Peak values.

Passenger traffic

Peak traffic day 2002		23.06.02	around 300 special trains,
			«Eidg. Turnfest», Expo
The 250,000th GA was sold	lon	14.11.02	in Zurich
Area of validity of the GA	km	23,023	of which
		5,127	Railways
		28	Mountain railways
		1,557	Urban lines (tram, trolleybus, bus)
		15,192	Postal and other bus lines
		1,119	Lakeboat lines
Companies participating	Number	200	among them 56 railways and
in the GA			16 boat companies
Day of record ticket sales	Number	222,075	of which at ticket machines
			(on 14 May 2002)
average per second (24 ho	urs)	2.57	tickets
Offered seats in double-dec	cker IC Seats	1,400	472 of which in 1st class
			(15 cars)
Freight traffic		0.000	
Heaviest freight train	gross tons	2,200	Solothurn-Frauenfeld (payload 1600 t)
- at the Gotthard		1,800	Traktion by 3 locomotives
Maximum payload	t	1,200	corresponds to about 40 road lorries
Longest freight train	m	1,600	Trial runs near Laufenburg
