YOUR REFLECTOR MAN JUST ANYWHERE

**Wild DIOR 3002
for distance measurement
without reflectors**

Distance measurement without reflectors offers a host of revolutionary solutions for special problems in industry, in engineering and construction surveys, and in tunnel building. The DIOR 3002 is the perfect instrument wherever accurate, non-contact measurements have to be taken to inaccessible points, for example in quarries and on buildings, with considerable savings of time and cost compared with conventional methods.

Cross-section surveys; the determination of volume and liquid levels in storage tanks; surveys of dangerous, hot, or unapproachable objects: these are only a few among the many possible applications for the Wild DIOR 3002.

Send for detailed literature.
