## HANDY FEATHERWEIGHTS

## WITH BREAKTHROUGH PERFORMANCE

DI1000

DI3000  
DIOR 3002

DI55

**Wild DISTOMAT™ EDMs are not only extremely light and handy, but every one of them is at the top of its class.**

For routine surveying, the **Wild DI1000** is the EDM with outstanding performance. Its compact size, performance, and typical Wild accuracy are the key to its success. This minor master weighs only 600 grams (1.3 lb) and takes just 5 seconds to measure up to 1000m.

For medium range, there is the **Wild DI55**, the highly accurate DISTOMAT (3mm + 2ppm).

A typical measurement takes 4 seconds. In tracking mode, the distance is measured and displayed every second. The DI55 has a range of 5km and weighs only 1.1 kg (2.4lb).

For long-range applications, use the trendsetting **Wild DI3000**, the DISTOMAT with unprecedented performance, which measures distances up to 14km in only 0.8 seconds. With a standard deviation of 3mm to 5mm + 1ppm, this DISTOMAT is suitable for all types of surveying tasks and special non-geodetic applications. The DI3000 weighs only 1.7kg (3.75lb).

The **Wild DIOR3002** is a special version of the DI3000, for measuring distances up to 250m without the need of a reflector. That's the fast, easy way to survey even inaccessible points.

All three Wild DISTOMATs, the DI1000, DI55, and DI3000 fit any optical or electronic Wild theodolite. That makes your equipment adaptable to any task at little cost.

Ask for detailed literature. ■
