A large black and white aerial photograph of a bridge under construction. The bridge has a curved concrete deck supported by a central pier and several stay cables anchored into the ground. A worker is visible near the pier. The background shows a hilly landscape.

## VSL S.T.A.Y C.A.B.L.E.S

yet another  
successful construction  
system from VSL!

The 'VSL Stay Cables System 200' is a typical VSL innovation:

Developed from the well-proven VSL Post-tensioning System.

Simple, clear in concept, of high quality, reliable, economical.

Backed by people who are specialists, each one a professional in his own field.

VSL – known for its special construction systems and its efficiency and reliability as a specialist subcontractor in post-tensioning, ground anchors, heavy lifting and other related fields.

VSL – worldwide, always close to you.
