### Girls' home near Nuremberg (pages 166-168)

The structure of the upper storey is partly a structural steel frame and partly monolithic with hollow blocks of pumice concrete. The outer walls are plastered and whitewashed. The floating asphalt floor over the solid concrete slabs was laid with linoleum or Semastic tiles, the double-shell roof of timber was given a protective skin of sheet metal. The sheet metal of the eaves and windows was painted orange, and the pillars and cornice flashing of the upper storey were finished in black. All windows are double on the Corda system and are set off in blue and white.

### Household management school at Schönenwerd/Solothurn (pages 169-171)

At Schönenwerd, a heavily industrialized district on the R. Aare, the existing school was to receive extensions in the form of a household management school and a gymnasium. The marginal areas of the present school site were available for the new buildings. The new gymnasium was to be annexed to the old one in such a manner that the cloakroom could be used

by both. The household management school was to comprise three handicraft rooms, two school kitchens with dining-areas between, two household management rooms with a laundry and drying and ironing-rooms.
