Contents

1 Introduction	149
2 Pre-Himalayan tectonics, sedimentation and magmatism of the North Indian crust.....	149
<i>The Lesser Himalaya</i>	149
The Rampur Formation (Proterozoic)	149
The Garsha and Bering Formations (Proterozoic)	150
The Shali Formation (early and middle Riphean).....	150
The Simla Slates (late Riphean-Vendian)	150
The Jaunsar Formation (late Riphean-Vendian).....	152
The Blaini Formation (Vendian).....	152
The Krol Formation (Vendian)	152
The Tal Formation (Early Cambrian).....	152
The Lower Crystalline nappe	153
Conclusions on the stratigraphy of the Lesser Himalaya	153
<i>The High Himalaya</i>	153
<i>The Gondwanan series</i>	153
The Haimantas (Riphean?-Early Cambrian).....	153
The Lower Haimantas (Riphean?)	153
The Middle Haimantas (Vendian?).....	154
The Upper Haimantas (Vendian?-Early Cambrian).....	154
The Karsha Formation (Middle and Late Cambrian).....	154
The Kurgiakh Formation (Late Cambrian)	154
The Thaple Formation (Ordovician).....	155
The Ordovician magmatism	155
The Muth Formation (Devonian)	156
The Lipak Formation (Middle Devonian-Early Carboniferous).....	156
The Early Carboniferous continental basalts.....	156
The Po Formation (Late Carboniferous)	156
The Ganmachidan Formation (Early Permian).....	156
The Panjal Traps (Late Carboniferous-Early Permian)	156
The Yunam granite (Early Permian, 284 ± 1 Ma, U-Pb zircon age)	157
<i>The Neotethyan shelf</i>	157
The Kuling Formation (Late Permian).....	157
The Lilang Group (Triassic)	157
The Tamba Kurkur Formation (Scythian-Anisian).....	157
The Hanse Formation (late Ladinian-late Carnian)	157
The Nimaloksa Formation (late Carnian-lower Norian)	157
The Alaror Group or Quartzite Formation (Norian)	158
The Kioto Formation (late Norian-Liassic-Aalenian)	158
The Laptal Beds (early Callovian).....	158
The Middle Jurassic alkaline magmatism	158
The Spiti Shales (Oxfordian-early Berriasian).....	158
The Giujal Sandstones (Early Cretaceous)	158
The Chikkim Formation (Cenomanian-Campanian)	158
The Kangi La Shale (Late Cretaceous)	158
The Stumpa Quartzite (Danian)	158
The Shinge La Formation (Paleocene)	158
The Kong Formation (Ilerdian-Ypresian)	159
Tertiary Olistostrome	159
The Neotethyan slope	159
The Lamayuru Formation (Early Permian-Late Cretaceous)	159
Conclusions on the composition and history of the Pre-Himalayan North Indian continental margin	159
3 Elements of the Neo-Tethys ocean crust, island arcs and the Ladakh batholith of the Asian margin	161
<i>Oceanic crust, Spongfang Klippe, Karzok unit and blueschists of the Indus Suture zone</i>	161
<i>The Nindam-Dras Formation (Callovian-Cenomanian).....</i>	161
<i>The Ladakh intrusives of the active Asian margin ($103 \pm 3 - 49 \pm 0.8$ Ma, U-Pb zircon ages)</i>	161
4 The Himalayan tectonics, metamorphism, magmatism and sedimentation	161
<i>The Indus Group (Late Cretaceous-Neogene)</i>	161
The Khalsi Limestone (Aptian-Albian)	162
The Miru-Chogdo Flysch (Cenomanian-early Eocene)	162
The Gongmarula-Hemis-Nurla Molasse (early Eocene?)	162
The Basgo Formation (Maastrichtian)	164
The Nimu Sandstones (Paleocene-Lower Eocene?)	164
The Temesgam Formation (Paleocene-early Eocene?)	164
The Chilling and Butum-Kargil Formations (Mio-Pliocene?)	164
The tectonics of the sediments of the Indus Group	164
The metamorphism of the Indus Group	165
<i>The Himalayan nappes</i>	165
The Shikar Beh nappe	165
The N-verging Warwan, Bobang, Bor Zash and Wakha recumbent folds and N-directed Dras nappe	166
The Barrovian metamorphism (M1) of the Shikar Beh nappe stack	166
The North Himalayan nappes	167
The eclogitic Tso Morari nappe	167
The high pressure metamorphism (M2) of the Tso Morari nappe	167
The higher (non eclogitic) units of the North Himalayan nappe stack	167
The Barrovian metamorphism (M3) of the North Himalayan nappe stack	171
Kinematics of the North Himalayan nappes	171
The High Himalayan nappe or "Crystalline nappe"	172
The tectonic units of the Lesser Himalaya	173
The Lower Crystalline nappe	174
The Barrovian metamorphism (M4) of the High and Lesser Himalayan nappes	174
The Zanskar Shear Zone, the Miocene leucogranites, the Gianbul dome, the Kanjar shear zone and related retrograde metamorphism (M5)	175
The history and origin of the metamorphism of the High Himalayan or "Crystalline" nappe	175
<i>The Subhimalaya</i>	176
The Subathu Formation (Thanetian-Lutetian)	176
The Murree Formation (Oligocene? – Early Miocene)	177
The Siwaliks or Siwalik Group (Miocene-Present)	178
The Himalayan Frontal Thrust Belt	178
The Neogene and Quaternary Himalayan accretionary wedge and active Himalayan structures	179
5 Discussion and conclusions on the structural and metamorphic evolution of the Himalayan range and its sedimentary record	181
<i>The age of the continental collision</i>	181
<i>The geometry of the N Indian margin before continental collision</i>	181
<i>The formation of the Himalayan accretionary wedge</i>	182
<i>Estimates of the post collisional shortening in the Himalaya</i>	186
<i>Doming and NE-verging backfold structures</i>	186
<i>Conclusion</i>	187
