Annual compilation (1985) of Hydradephaga (Coleoptera) papers

by M. Brancucci & K. Dettner

Abstract: The authors give a list of additional papers for 1984 and the 193 papers published during 1985 on all aspects of Hydradephaga (Coleoptera: Trachypachidae, Coptoclavidae, Necronectidae, Parahygrobiidae, Hygrobiidae, Amphizoidae, Haliplidae, Noteridae, Dytiscidae and Gyrinidae)

Key words: Hydradephaga – 1985 – compilation.

In 1985 we published the first compilation of papers on Hydradephaga (Coleoptera) covering the year 1984. In the meantime we have become aware of the fact, that a complete list can be only achieved by a close collaboration between all Hydradephagan workers. The difficulties in overviewing the complete range of papers concerning one group are well illustrated by the additional 19 references for the year 1984 which have been included now. Therefore any support will be highly appreciated in the future!

The present compilation for 1985 now includes 200 references from 196 authors.

As in the previous compilation, only papers published in 1985 have been included. Those publications recorded for 1985 but actually published and issued in 1986 will be included in the 1986 compilation. Thus, if the name of an author is followed by two dates, the first refers to the year in which the publication was recorded, the second (in brackets) to the actual year of publication. Papers are quoted by their original titles apart from non-roman alphabetical publications where we furnish an English translation and indicate the original language within square brackets, e.g. Japanese [Ja], Russian [Ru], etc.

Additional papers 1984

- DROSTE, M. (1984): *Charakteristik der Wirbellosenfauna flacher Gewässer in einem Niedermoor*. Verh. Ges. f. Ökol. (Bern 1982) 12: 361–366.

For forthcoming compilations, we would appreciate receiving any citations, reprints and unpublished informations (e.g. Ph. D. Thesis, written experiences) relating to Hydradephagan beetles. This information material can be sent to the first-mentioned author.

Acknowledgements

We would like to express our very special gratitude to Stefan Ruhnau (Tübingen) for his active help in adding numerous papers and in correcting and controlling the references cited.

We are also greatly indebted to all colleagues who have collaborated, in particular to F. Bameul (Bordeaux). G.N. Foster (Prestwick), M.

Holmen (København), A. N. Nilsson (Umeå), F. Pederzani (Ravenna), P. Riha (Praha), S. Rocchi (Firenze), R. E. Roughley (Winnipeg) and H. Schaefflein (Neutraubling) who have made valuable additions and comments.
