HOME NEWS

As from April 1st no further subsidies will be granted by the Confederation for the provision of relief work for the unemployed; it is stated that their continuation is incompatible with the finan-cial position of the State, and retards the return of normal conditions in the economic life of the * * *

During the last ten years the indebtedness of the Confederation, Cantons and Communes has increased about fourfold, and amounts now to some 6.5 milliard francs, or Frs. 1,666 per head of the population. The interest charge absorbs about 325 million francs, or 83 francs per inhabitant

Last year about half-a-million francs were granted to young emigrants in order to facilitate their start in foreign countries; for this year the Federal Council has withdrawn this valuable en-

In reply to a motion, drawing attention to the fact that in certain frontier districts, especially Basle and Geneva, foreign letters and printed matter are posted outside Switzerland, the Federal Council states that it is unable to stop this unpatriotic practice which is depriving the Swiss Post Office of considerable sums.

The accounts for 1933 of the Capton Gloric

The accounts for 1923 of the Canton Glaris close with a surplus of Frs. 119,471, against an anticipated deficit of over Frs. 400,000.

Amongst the penalties, enacted by a divisional court sitting at Solothurn, is one of ten days' imprisonment against an infantryman for wearing army trousers unlawfully.

The proposed ratification of the Opium Convention is meeting with some opposition from the cantons of Basle, Zurich and Neuchâtel on various grounds, constitutional and legal.

Towards the reconstruction of the Furka road, which has recently been damaged by avalanches, the Confederation will contribute 50,000 francs.

Surprised by a heavy snowdrift, several members of a ski-ing party were buried on the Rautialp (Glaris), one of them, Mr. Albert Jenny, of Ennenda (Zurich), being unable to extricate himself. A search party subsequently recovered his body. body

Three months' detention and a fine is the penalty incurred by a Bernese business man, Mr. A. Ornstein, for having, some months ago, run over and killed through careless driving a local dentist, Mr.

For defamation of character, Mr. Georges Oltramare has been sentenced to a fine of 200 francs. Mr. Oltramare—commonly called Geo.—is a satirical Mr. Oltramare—commonly called Geo.—is a satirical writer and editor of a weekly publication, entitled "Pilori," in which he exposes and criticises the shortcomings of public institutions and politicians, especially when the latter belong to the Jewish faith. The plaintiff in the case was National Councillor Dicker, a Genevese advocate and leader of the local Social Democrats; born in Russia and naturalized a few years ago, he will be best remembered as representing the civil party in the Conraditrial.

PASSPORTS AND IDENTITY BOOKS.

The election manifesto of Mr. J. Scott-Duckers, the Liberal candidate for the Abbey Division of Westminster, contains the following reference which may raise the hopes—not too highly, we suggest— of the many globe-trotters who justly resent the present restrictions and formalities:—

"As a believer in liberty and freedom, I am totally opposed to the vexatious restrictions upon shopkeepers and caterers which are a legacy of the war. I will give my fullest support to their entire abolition, as well as to the removal of other war-time vexations, such as Passports and Identity Books in the case of all persons of known respectability and good character."

EXTRACTS FROM SWISS PAPERS.

Artillerie ancienne. — Grâce aux démarches faites par M. Bujard, chef du département militaire, la Confédération a cédé à l'Etat de Vaud les deux grandes pièces d'artillerie qui étaient placées au sommet des forts de Dailly et qui viennent d'être déconferées. désaffectées.

désaffectées.

Ces deux canons, qui sont les plus longues pièces à feu de l'artillerie suisse, sortent des usines Krupp et mesurent 3 m. 66 de longueur et 10,5 cm. de diamètre. Elles datent de 1881 et sont de construction identique à celle des canons de 12 cm. Elles furent d'abord placées à l'arsenal de Lucerne, puis amenées en 1896 à Dailly où elles ont été en service jusqu'à l'an dernier. Construites pour la poudre noire, elles ont cependant donné d'excellents résultats avec la poudre blanche. Avec les obus elles portaient au delà de 10 kilomètres et avec les shrapnels au delà de 8 kilomètres. Chaque pièce a tiré jusqu'à maintenant 3000 coups. Le

les shrapnels au delà de 8 kilomètres. Chaque pièce a tiré jusqu'à maintenant 3000 coups. Le poids du projectile était de 16 kg.

Ces deux grandes pièces à affût sur roues seront placées devant le château de Morges à côté de deux canons de bronze du XVIIIe siècle, avec lesquels elles formeront les plus beaux ornements de notre Musée militaire. (La Revue.)

Eine Vergesslichkeits-Statistik. - Die Wach- und Eine Vergesslichkeits-Statistik. — Die Wach- und Schliessgesellschaft veröffentlicht eine kleine Statistik bei deren Lektüre man sich kopfschüttelnd fragt, wie so nicht noch mehr Diebstähle vorkommen. Offenbar gibt es eben doch noch mehr chrliche Leute als man aus dem Gejammer der Moralisten annehmen könnte. Die Wächter der Gesellschaft fanden in einem Jahr in der Schweiz auf ihren nächtlichen Runden: 18,409 Haustüren, 1,492 Kellertüren, 8,561 Gärten, 1,551 Stalltüren, 3,301 Geschäftstüren, 3,764 Magazintüren, 3,208

OFFICES OF 'THE STUDIO' LIMITED 44, LEICESTER SQUARE, LONDON, W.

div. innere Türen, 847 Verandas, 5,637 Fenster, 2,605 Roll-Läden und 81 Kassenschränke geöffnet. Ausserdem 3,310 steckengebliebene Schlüssel und 612 im Freien gebliebene Sachen.

Wenn man dann weiter liest, dass die Securitaswächter 333 gefundene Sachen abgaben und 18,578 brennende Lichter löschten, 303 oftene Wasserhälne

und 116 Gashähne schliessen mussten, so kommt man zum Schluss, dass Zerstreutheit und Vergess-lichkeit längst nicht mehr das Vorrecht von Ge-lehrten und Professoren ist. (Basler National-Ztg.)

NOTES AND GLEANINGS.

By "KIBURG.

Broadcasting on the Alps

Broadcasting on the Alps.

The Star (5th March):—

The Swiss Alpine Club has been enlisting the aid of "broadcasting" in its lite-saving work on the mountains. Small receiving stations have been established in the club chalets and the Alpinist centres, for the purpose of receiving calls for help from those in trouble in the wild.

Tiny portable receiving and dispatch sets are being used by tourists.

As the distances to be covered are never great when measured in an air line, weak currents are satisfactory.

Observatories on Mont Blanc.

The Times (4th March):-

I am pretty certain that the following article will greatly interest a number of our Swiss readers. Mont Blane is a tragic mountain, for no fewer than 80 fatal accidents, largely due to avalanches and storms, have occurred to climbers, guides, scientists and others in its ascent or descent, and of the four observatories which have been buried in snow or destroyed. The fact of its supreme height in Europe, 15,782 ft., has proved very tempting to scientists for the carrying out of observations in the higher reaches of the atmosphere, and it is satisfactory that one of these observatories, that of M. Joseph Vallot on the Rocher des Bosses, 14,312 ft. above sea level, has proved of permanent value and great usefulness. The disappearance of the summit observatory of Dr. Janssen has not been an unmixed evil, for to most mountain lovers and climbers its presence was little short of sacrliege, and it is a satisfaction to know that the pure white dome of snow, only large enough to accommodate two or three Topes of climbers, is now unsulled and free.

On the writer's ascent of the mutation last August he was much interested, admining his observatory, to see lying on the cetted adjoining his observatory, to see lying on the cetted adjoining his observatory, to see lying on the cetted and price of the content of the cold case become of the two guides with and between whom the writer was roped, volunteered the information that this was indeed the débris of the famous observatory, and that it had sunk in the unfathomable snow of the summit, worked the way out to the Chamonix side of the steep snowfield, and been transported with incredible labour to the position where it lay.

As even more romantic stories were current, it appeared advisable to the writer to have a definite authentic record of the true facts, and, thanks to the most kindly response of M. Joseph Vallot himself, especially considering his great age, and also to M. Paul Cupelin, the Chief Guide of the Chamonix community of guides, the true story is briefly rela
