FURTHER GOLD SHIPMENTS TO SWITZERLAND.

The National Bank has purchased another 60,0008 worth of gold from America. Despite the fact, however, that Switzerland has gold cover equal to 140 per cent. of her fiduciary issue, she has an adverse trade balance of approximately £36,000,000. The following table shows the countries on and off the gold standard:

ON.	OFF.
United States.	Great Britain.
Germany.	Australia.
France.	India.
Switzerland.	Irish Free State.
Austria.	The Rhodesias.
Belgium.	Egypt.
Italy.	Brazil.
Holland.	Mexico.
Czecho-Slovakia.	Spain.
Poland.	Russia.
Bulgaria.	Denmark.
Greece.	Finland.
	Portugal.
	Sweden.
	Norway.

Japan and Canada have placed embargoes on the export of gold.

ECONOMIC SITUATION IN SWITZERLAND.

Judging by Federal councillors' speeches and resolutions passed by industrial and workers' associations, the economic situation in Switzerland is steadily becoming worse. Unemployment has considerably increased during the last few months. Most of the metallurgical and electrical factories in the Zurich region are only working three days a week. Exports are also declining; the total value in 1929 was 2,000,000,000 francs, in 1930 1,768,000,000 francs, and in the first nine months of this year only 1,036,000,000 francs.

SWISS FEDERAL RAILWAYS.

Although Switzerland is hard hit by the prevailing trade depression, the budget of the Federal Railways—the most important commercial undertaking in the country—is inclined to optimism. This is due to the accepted tradition that in times of stress the State railways must do their utmost to assist the Government in relieving unemployment by providing orders for Swiss manufacturers. In pursuance of this policy, and notwithstanding a considerable decrease in traffic during the first 10 months of the year, the Federal Railways have budgeted no less than 86,000,000f. for construction work during 1932—i.e., only 2,600,000f. less than in 1931. The bulk of this sum is earmarked for the completion of the double-track programme, the continuation of the second electrification scheme, improvement of stations, and, more especially, the transformation of further rolling stock for electric traction. This last item will provide considerable work for the Swiss machine industry and will, it is estimated, absorb approximately 35,700,000f.

Usually powerful electric locomotives will be run very shortly on the St. Gotthard line. These have been built by the three principal engineering firms in Switzerland, measure 34 metres in length, have 14 axles, and weigh 240 tons. They are rated at 8,500 h.p. and will be able to draw goods trains of 750 tons without relay on the steep ascent of the St. Gotthard at a speed of 60 km. on a gradient of 1 in 38 and a maximum speed of 100 km. (60 miles) on the level.

THE OFA COMPANY'S YEAR.

The Ofa company, which has its headquarters in Geneva, and operates a number of timber enterprises in Eastern Europe, shows net profit 557,226 Swiss francs for the past year, but no dividend is proposed owing to the difficult trading conditions in the industry. The turnover declined by about one-third but general expenses of the various subsidiaries were reduced by about 35% to 40%, and overhead expenses (head office and sales departments) by about 25%. The balance-sheet shows against assets 26.3 million Swiss francs, liabilities 9.9 million. Liabilities show an increase of about 2.6 million on the year, but the operating subsidiaries have entirely paid off

their debts and have repaid 2.5 million as balance of the purchase price of forests. There is now no liability outstanding under the latter heading.

The consolidated balance-sheet covering the company and all subsidiaries shows an improvement of about 3 million Swiss francs in the liquid position on the year, a striking achievement in a difficult period.

SWISS CHRISTMAS STAMPS.

For some years the Swiss postal authorities have issued special Christmas stamps, which are sold at slightly above face value, the difference being devoted to a fund for child welfare.

The sale of these "Pro Juventute" stamps, the purchase and use of which for Christmas postage in place of the usual issues is, of course, quite optional, totals many millions every year, yielding some 300,000 francs per annum for the combating of infantile diseases and the provision of children's holiday homes.

The re-trial of Dr. Riedel, a medical practitioner, and his former mistress, Miss Guala, who are accused of having poisoned the former's wife, is still occupying the Assizes at Burgdorf. Councils for the defence have accused the presiding judge of partiality, whereupon, Dr. Stauffer left the court. Later on an explanation was given by the defence and the accusation was withdrawn, the judge then resumed his seat. The verdict is expected daily.

On going to press, we hear that Dr. Riedel and Antonia Guala have been found not guilty of murder, they have been found guilty of performing and abetting an illegal operation. Their civil rights are restored and £750 compensation are awarded to Antonia Guala, and £1,800 to Dr. Riedel.
