The Federal Council has nominated Monsieur Pierre Micheli, at present Head of the Division for International Organisations at the Federal Political Department (Swiss Foreign Office), to the post of Minister Plenipotentiary and Envoy Extraordinary to the Republic of France, in succession to Minister Peter von Salis. The Swiss Government has expressed to the latter its high appreciation for the valuable services he has rendered.

Minister von Salis was born in 1898, and is a citizen of Soglio (Ct. Grisons). He studied law at the University of Berne, where he obtained the degree of doctor of law. In 1929, M. von Salis entered into the Diplomatic Service and a year later, he was transferred to the Swiss Legation in Washington with the rank of Attaché. The Swiss Federal Department of Justice and Police announced that in view of reports that a party of Algerians were planning, with the help of Swiss citizens, to make attempts against the French Embassy and consulates in Switzerland, the Attorney-General had ordered an inquiry. It had been found that there was some truth in the rumours. A number of persons have already been arrested or questioned in Zürich.

The popularity of Swiss health resorts reached a peak in 1955 never recorded before in the history of spa statistics. Hotels included in this report, not counting guests spending their vacation in private apartments, rooms, or in popular spa establishments, registered 660,754 overnight stays in 1955, corresponding to a 7.5% increase over the previous year. Popular spa hotels also recorded a surge of holiday seekers last year. Their overnight stays rose from 164,223 in 1954 to 217,457 in 1955.

Since the inauguration of the restaurant at the Zurich-Kloten airport more than half a million francs have been invested to cope with the immense throng of flight passengers and visitors. It was revealed recently that the construction of an additional restaurant for the sole purpose of accommodating transit passengers and airport personnel has been envisaged at Kloten to relieve the pressure on the existing facilities. The cost of this project is estimated at 1 million Swiss francs. The Swiss airport restaurants have the important task to present themselves as the epitome of Swiss hospitality and gastronomy to air-borne visitors and transients. Thus everyone at Kloten can depend on quick and friendly service and on expertly prepared and presented international menus.

50 Years of Swiss Postal Motor Coach Service.

The Swiss Postal Motor Coach Service commemorates its 150th anniversary this year. A special jubilee postage stamp issued recently recalls the event. A road network of over 5,000 miles is today provided with a bus service by 1,216 motor vehicles, conveying over 22 million passengers yearly. In the year of 1916 the first postal motor coach service was inaugurated between Locarno and Brissago and two years later the Toggenburg line, between Nesslau and Wildhaus, followed. In 1919 the bus services Reichenau-Waldhaus-Flims in the Grisons and Brig-Gondo in the Valais were opened, constituting the first proper alpine motor-coach communication, which expanded in the ensuing years from one pass to another, from the San Bernardino (1920) to the Susten (1946).

"Musical September" in Montreux and Vevey — 7th-25th September, 1956.

Eight symphony concerts featuring such famous conductors as Otto Klemperer and Igor Stravinsky will highlight the programme of this year's "11th Musical September" to be held in Montreux, the well-known resort on Lake Geneva. At nearby Vevey three chamber music concerts with the participation of Clara Haskil and Arthur Grumiaux will follow from September 28th to October 5th. The first four symphony concerts at Montreux are to be performed by the Cologne Symphony Orchestra, the last four by the "Orchestre National" of Paris. Among the soloists of world-wide renown are the pianists Nikita Magaloff and Wilhelm Kempff, as well as the violinists Nathan Milstein and Isaac Stern.

Electric Railway Connections to the "Turntable of Europe".

Switzerland has granted to the State Railways of France, Italy and Germany considerable subsidies for the electrification and modernization of their most important rail links to the Swiss borders. The French National Railways (S.N.C.F.) are adapting the last stretch of the Paris-Simplon-Italy trunk line, still operated with steam locomotive (Dijon-Vallorbe) to the full-scale electric service. The link between Frasné and Les Verriers, farther to the North, is also being converted to the electric system. The rail links which are now in process of electrification, converge, in the Swiss Alps, into the Simplon Tunnel, a masterpiece of engineering completed exactly 50 years ago.
