SWISS SKILL AT INTERNATIONAL MACHINE SHOW.

Left to Right: Mr. G. Clements (Director), Mr. F. P. P. Maurice (left rear), Dr. R. Faessler.

Swiss engineering skill — still the finest in the world — played a prominent part in the International Machine Tool Exhibition at Olympia, which ended on July 6th,

The British company of a well-known Swiss firm, exhibited a range of jig borers, measuring machines, and profile projectors designed and produced at the parent works at Geneva. Their stand at the International Machine Tool Exhibition had attracted the attention of British, American and Continental buyers.

One of the visitors was Dr. René Faessler, Commercial Counsellor at the Swiss Legation, London. He examined the equipment of one of the Society's profile projector which guarantees a magnifying accuracy to 1/000th of the nominal value, (see picture) all made by the Société Genevoise d'Instruments de Physic (SIP), with Mr. F. P. P. Maurice, Chairman of the Company, and President of the committee of the European Machine Tool Exhibition.
