| Montreal | Tel Aviv | Paris . . . |

We still do—but now we
also take in Nairobi Dar-es-Salaam and
Johannesburg.

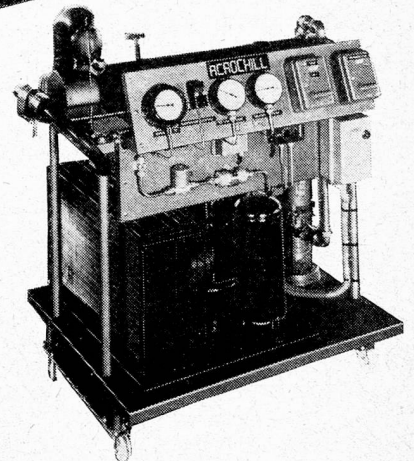

CHECK THE COST OF WATER!

Recirculation saves money

Get around to recirculation thinking on water usage and cut costs dramatically. The RTC series of package tank coolers and hermetic air-cooled package chillers make pure economic sense. Acro-Kool has process and drinking water applications. The ice-bank build-up system gives a large output quickly and still saves.

Acrochill offers this typical performance: 300 gph with water discharged at 60°F with a temperature difference of 10°F. This machine is widely used in injection moulding, metal plating, bakery and confectionery. All units are factory-tested for rapid installation.
