Venue: Conference Room, 'A', 8th Floor, Scotrail House, 58, Portdundas Road,
Glasgow. Meetings start at 1930 hrs.

Please contact organiser for details of meetings

Query Corner

Answer Q1 : Semaphore Signal at Interlaken Ost

Regarding my own query, the SBB has kindly provided the answer. This type of
signal was never used by the SBB and the particular example was a gift from
the DB to the Jungfraubahnen!

J.E.Daboo

While I have not seen the signal, it sounds like a Bavarian *Rhue* signal.

These were introduced in 1893 and the last working examples were at
Freilassing ca 1977. They have three aspects:

- 1 Line clear for train to depart. Green light, arm inclined upwards at 45°
- 2 Train stop and shunting signal. Red light, arm horizontal
- 3 Line clear for shunting (*Rhue* position). Blue light, arm inclined
vertically downwards

The signals were only used as starting signals, not home signals.

Originally the arms were of red lattice construction with a white band along
the middle of the arm (similar to the Austrian flag).

Latterly the arms were pressed from sheet metal and were white with a red
border. The signals generally had a red RU plate on the post.

Peter G.Binnarsley
