470 007 passes 'over the top' at Airolo in deep snow (about 30 cm) on 22 12 09. It was on time northbound Milano - Zürich, just 9 days into the new timetable, and already has got Trenitalia marking in place of the discredited Cisalpino.

At Flüelen on a private siding (and not accessible) there is this four-wheel, side rod-transmission, diesel shunter built by Ruston in Britain. Bryan knows nothing of this little engine, but it looks rather like those used on BR at one time, 11507 and 11508, built in 1956, of which his ABC tells him they had an 'SLM type friction clutch in a Ruston gearbox'. He wonders if its a cousin of those.
